

DID YOU KNOW?

Everything we use and do requires water? **Direct water use** is when we use it for drinking, bathing, or cooking. But what is **indirect water use**? This is the water that is needed to make something or used during the process of providing a service.

Put the letter "D" for the examples below that are direct water use and put the letter "I" for the examples of indirect water use. Also note how many gallons of water are used, it might surprise you!

D

Taking a 5 minute shower (~25 gallons)

I

To make a hamburger patty (~over 600 gallons)

I

To make a cell phone (~3,190 gallons)

D

Washing a car by hand (~ 100 gallons)

I

To make a small bag of potato chips (~49 gallons)

I

One pair of cotton jeans (~2,866 gallons)

D

Using a high efficient dish washer (~4 gallons)

D

Taking a full bath (~50 gallons)

I

To grow 1 serving of pasta (~56 gallons)

I

1 piece of paper (~1.3 gallons)

I

Production of finished steel to make one car (uses ~62,500 gallons)

D

Handwashing dishes (~20 gallons)

I

1 Plastic water bottle (~1.4 gallons)

I

1 cup of orange juice (~49 gallons)

Answer Sheet

Water Wise or Water Waste?

Look at the pictures and circle the option that is waterwise:

<p>It's just a little drip!</p>   <p>I must stop the leak!</p>	   <p>ECO-FRIENDLY</p>
<p>CAR WASH</p>   	<p>I'm always thirsty!</p>   <p>I'm drought tolerant & native</p>
 <p>Pesticides & Herbicides</p>	<p>Eco-friendly, non-toxic natural products</p>  <p>It's my dog, so it's my job to clean it up!</p>   <p>The rain will wash it away!</p>
 <p>Dispose of properly!</p> 	 
<p>Other ways I can help!</p>     	

Answer Sheet

SUSTAINABILITY ACTIONS

Place a check ✓ next to each item **YOU** can do to help conserve and keep our water clean.

Water plants instead of pouring water down the drain.

Make sure family's car isn't leaking oil in driveway.

Try to take shorter showers.

Let my trash blow away in the wind.

Pick up after my dog and remind others to do the same.

Be a detective and always be aware of possible leaks.

Bring my own reusable water bottle.

Always use a hose nozzle on my hose.

Plant native and drought-tolerant plants that belong here.

If I wash my car at home, let the hose run the whole time.

Run the washing machine even when it isn't full.

Recycle whenever possible.

Always leave the water running when brushing my teeth.

Don't care about the dangerous chemicals my family uses.

I PLEDGE to become a **water steward** and to do my best to make smart choices and take actions that help conserve and keep our water supply clean:

Name: _____

Date: _____

Water Wise Technologies

These are things you can try to use at home!

High Efficiency Shower Head

Did you know?

The average person uses up to 40 gallons per day just by showering. That's 14,560 gallons of water per year!

Uses 2.0 gallons per minute.

Did you know?

A garden hose could release anywhere from 9 gallons to 30 gallons per minute that water is running!

Hose nozzles save water by temporarily stopping the flow of water and you can also adjust the pressure for your need.

Hose Nozzle

Aerator

Did you know?

Aerators are found at the head of a faucet. They mix air and water together to create more pressure and to use less water.

no aerator vs. aerator

2.2 gal vs. 0.5 gal

If water flows steady with air bubbles that looks white, then you have one, but if water is clear then you may need one.

Did you know?

A toilet flapper stores water in the tank. When you flush, the handle lifts the flapper and lets water into the toilet bowl, then closes back up tightly like a door between two rooms. Flappers are made of rubber and can easily dry out causing a leak. It can waste up to 200 gallons a day!

Want to be a detective and try an experiment? See how on the next page!

CAN YOU FIND THE LEAK?

Toilet Leak Challenge:

- Let's make sure your **toilet flapper isn't leaking!**
This experiment can be done several times a year or whenever you suspect a leak.
 - With permission from an adult, you can put some food coloring in the toilet tank.
 - Set a timer and **do not** flush your toilet for 30 minutes.
 - Then go back and see if the colored water flowed into the toilet bowl.
 - If you saw any color in your bowl then your flapper is leaking and it is time to replace it.
 - With assistance, measure the size of your current flapper so you know what size to replace it with. Then your family can purchase a new one.
